PUBLIC SERVICE
COMMISSION

Dear Mr. Derouen:

Enclosed is the affidavit of Publication of Hearing Notice from Anita Richter, Managing Editor of Kentucky Living, and two copies of the hearing notice for Blue Grass Energy.

This is for the period November 1, 2014 through April 30, 2015 for Case No. 2015-00239.

If you have any questions, please contact me at (859) 885-2117.

Sincerely,

Phillip Johnson
Vice President, Finance & CFO
Blue Grass Energy Cooperative Corporation

ENERGY 101

The importance of good insulation

Better insulation equals better comfort in all areas of your home—and can help lower your energy bills

Did you know that heat flows naturally from a warmer space to a cooler space? Insulation's job is to block that flow so you'll be more comfortable in your home year-round. And good insulation also means that your home's heating and air-conditioning systems won't have to run as often.

During the winter, heat moves directly from your living spaces to adjacent unheated attics, garages, basements, and even outdoors. It can also travel indirectly through interior ceilings, walls, and floors, anyplace there's a difference in temperature. During the summer, the opposite

happens—heat flows from the exterior to the interior of your home.

Properly installed insulation creates resistance to heat flow, and is measured or rated in terms of its R-value. The higher the R-value, the greater the insulation's effectiveness. The more heat flow resistance your insulation provides, the lower your heating and cooling costs will be.

A well-insulated home is one of the most cost-effective means of saving energy and lowering your energy bills.

See page 31 of the *Kentucky Living* 2015 Energy Guide for more on how to check your home for leaks and seal them.

ENERGY BASICS

INSULATING YOUR HOME TO LOCK IN EFFICIENCY AND SAVINGS

Adding insulation in the areas shown here may be the best way to improve your home's energy efficiency. Insulate either the attic floor or under the roof. Check with a licensed contractor about crawl space or basement insulation.

- 1 Attic
- 2 Walls
- 3 Floors
- 4 Basement
- 5 Crawlspace
